

Craven County Schools Graduation Project Product Description

This form is completed prior to beginning the product. Type or use blue or black ink. Answer each question in complete sentences and use correct grammar. The minimum 15 hour product is a graduation requirement.

Student: Asya Taylor Date: October 6, 2012

Topic: Causes and effects of self-hatred and prejudice within the African-American community; emphasis on colorism.

1. Write a summary of your CCSGP research paper.

Colorism, like any other form of self-hatred, is destroying the current and future African-American community. It is a mental state; self-oppression. Such self-hate and prejudice is a huge part of the African-American life. Through education and intolerance, colorism can be destroyed. Through continuous effort, the idea of colorism will be unheard of in ten years.

2. Explain **in detail** how you will spend a minimum of 15 hours creating your product. Remember the product's purpose is to show what you learned during this time.

With the 15 plus hours allotted, I plan to create and distribute an in-depth questionnaire to African-Americans of all ages and ethnic background. After receiving the subject's feedback, I'll assemble a public website presenting the data. With the information, I'll be able to offer a look at the beginning, growth, and effects of colorism in a easy way.

3. What resources will you need to complete the product? (Ex: transportation, supplies, computer access, etc.)

For my product, I will need Internet access, Word processing software, and subjects to interview.

4. Explain how your product relates to your research. My product of a website about colorism would document and represent all of the information I acquired through my questionnaire that is also about discrimination.
